Anyan's comments:

FHS episode 44! It was kind of a hasty job, and I accidentally lost a psd file ;_;. The model car the U-2 plays with is the 'chase car' that helps with the landing process.

The thing on YAL-1 is not an eye... but rather a laser pod that takes out missiles at high altitude... though the whole project has been canned now.

The last episode is about the F-111... but it's about how the T-50 read the F-111 as ha cheon (下川)... yeah, a lame one (sorry ;_;)
